

proBOND Premium

Signage Grade Aluminium Composite Material

The proBOND range of Aluminium Composite Materials are manufactured on dedicated continuous thermal plying composite lines, capable of bonding high quality aluminium coil to PE using a high specification DuPont® adhesive film. All proBOND materials are made to exacting standards under ISO14001 and ISO9001 conditions. Intense in-house inspection processes and an emphasis upon minimising waste are key features of proBOND production. To complete the offer, we provide a full cutting service utilising our high precision Schelling Saw.

proBOND Premium Aluminium Composite is the highest quality panel for the fabrication of three dimensional signage. Manufactured from the highest quality 5005 alloy proBOND Premium comes in the full range of white, colours, brushed, mirror and new High Metallic Silver. The optimised Matt White Digital Paint ensures excellent ink adhesion and high quality print reproduction, even at high speeds. proBOND Premium comes with a 10 year guarantee (5 years for 3003 alloy anodised finishes) and has numerous accreditations to ensure compliance to all recognised standards.

Features and Benefits:

- Excellent fabrication characteristics due to premium alloy
- High corrosion resistance
- Optimised Digital White Paint Surface for UV Printing (Matt White)
- High ink adhesion & excellent print reproduction at high speeds
- 'Easy-Peel' PE liners both sides
- Easy processing to 3D applications. Full fabrication including routing, folding and bending
- Made to tight manufacturing tolerances
- Fully recyclable
- ISO 9001 : 2008 and ISO 14001
- RoHS & REACH compliant
- EN13501-1:2007 / BS476 : Class 1
- EN 14509/AC: 2009 (CE)
- 10 year warranty (5005 alloy)

Where you would see me:

- Digital Print
- Indoor & Outdoor Signage and Decor
- Retail / Shop-Fit
- POS / POP Displays
- Exhibition Stands
- Furniture Design
- Cladding
